39L1350UC

LED TV

Entertainment spaces can still pack a punch – especially when equipped with a Toshiba L1350 series LED TV. LED Backlight technology creates great picture quality with better contrast, brightness and colour. Combined with Gaming Mode and Audyssey™ Sound Enhancements, this TV is sure to please movie buffs and avid gamers alike.

Advantages

CS120Hz ClearScan™

Toshiba ClearScan™ 120Hz doubles normal 60Hz performance to reduce blurring caused by fast-action video. It improves the picture clarity dramatically, without impacting brightness or adding flicker. This TV will be great for watching fast paced sports to your latest action-packed movie. Something the whole family will appreciate

HDMI X3

Digital input for the premium in high definition connectivity. An HDMI cable can transfer digital video and multi channel audio to compatible home theatre components and high definition televisions without the need to scale down or compress the signal. With 3 HDMI Inputs, connect multiple devices with HD quality!

USB MEDIA

Expand your entertainment options with the USB input. Simply plug in a USB flash drive loaded with digital photos or music files from your PC and start enjoying them with the built-in media player.

Gaming Mode

Toshiba's innovative video processing allows for shortened signal time (also known as input lag) from the video game console to the screen. Now you can respond faster and get the edge over the competition. Play the game the way it's meant to be played.

AUDYSSEY ABX

Want big sound, but a sleek design for today's contemporary living spaces? Audyssey ABX allows the TV's bottom mounted small speakers to produce big bass while Dynamic EQ audio processing technology brings out intricate audio details at all volume levels. Hear clear and crisp sound for all of your programming.
